FAUCETS**
Geberit Group

Commercial & Institutional Buildings

Every time you tackle a new project, you're faced with a new set of challenges. From hospitals to schools, every building has its own unique requirements.

You can find Chicago Faucets in education, healthcare, retail, and similar facilities across the country. The reason? We take the hassle out of selecting the right plumbing fixture for your application. This frees you to focus on your central mission: providing a safe, clean, comfortable environment. Here are just a few of the areas where Chicago Faucets make your job easier:

The Most Preferred Brand — In a recent survey, Chicago Faucets was selected as the most preferred commercial faucet brand by leading professionals.

Conservation & Sustainability — Easily select and specify products designed to limit flow rate and operating time to help conserve water. Chicago Faucets actively supports the Water Efficiency (WE) category of LEEDv4 by offering hundreds of products that help you achieve the necessary credits for Indoor Water Use Reduction.

Flexibility & Expandability — When facility usage changes, there's no need to tear out and install new fixtures. Changing components like handles, spouts, and cartridges on your Chicago Faucets is a snap, saving time and reducing inventory for facility maintenance.

Cleanliness & Sanitation — Enhance sanitation and safety with hands-free electronic faucets and a wide selection of pedal-operated products.

Accessibility — Choose from a comprehensive offering of products that meet the requirements of the Americans with Disabilities Act.

Made in the USA — Selecting products that meet the requirements of the Buy American Act can help support jobs across the USA. At Chicago Faucets, over 95% of our products meet these requirements.

Attention to detail delivers

Unparalleled quality.

Every Chicago Faucets product is manufactured to the same high standard that has made us the choice of professionals for over 100 years. Shown below are examples of the kind of product features that represent our extraordinary attention to detail.

Virtually indestructible.

Forged brass one-piece body with components made of brass and metal to withstand years of use and abuse.

Water conserving.

Faucet automatically shuts off after a set cycle time. Factory pre-set is 10 seconds or .25 gallons per cycle for dramatic water savings.

Vandal proof.

Components are designed so they can only be removed by maintenance personnel with special tools to help eliminate theft and tampering.

Easy to maintain.

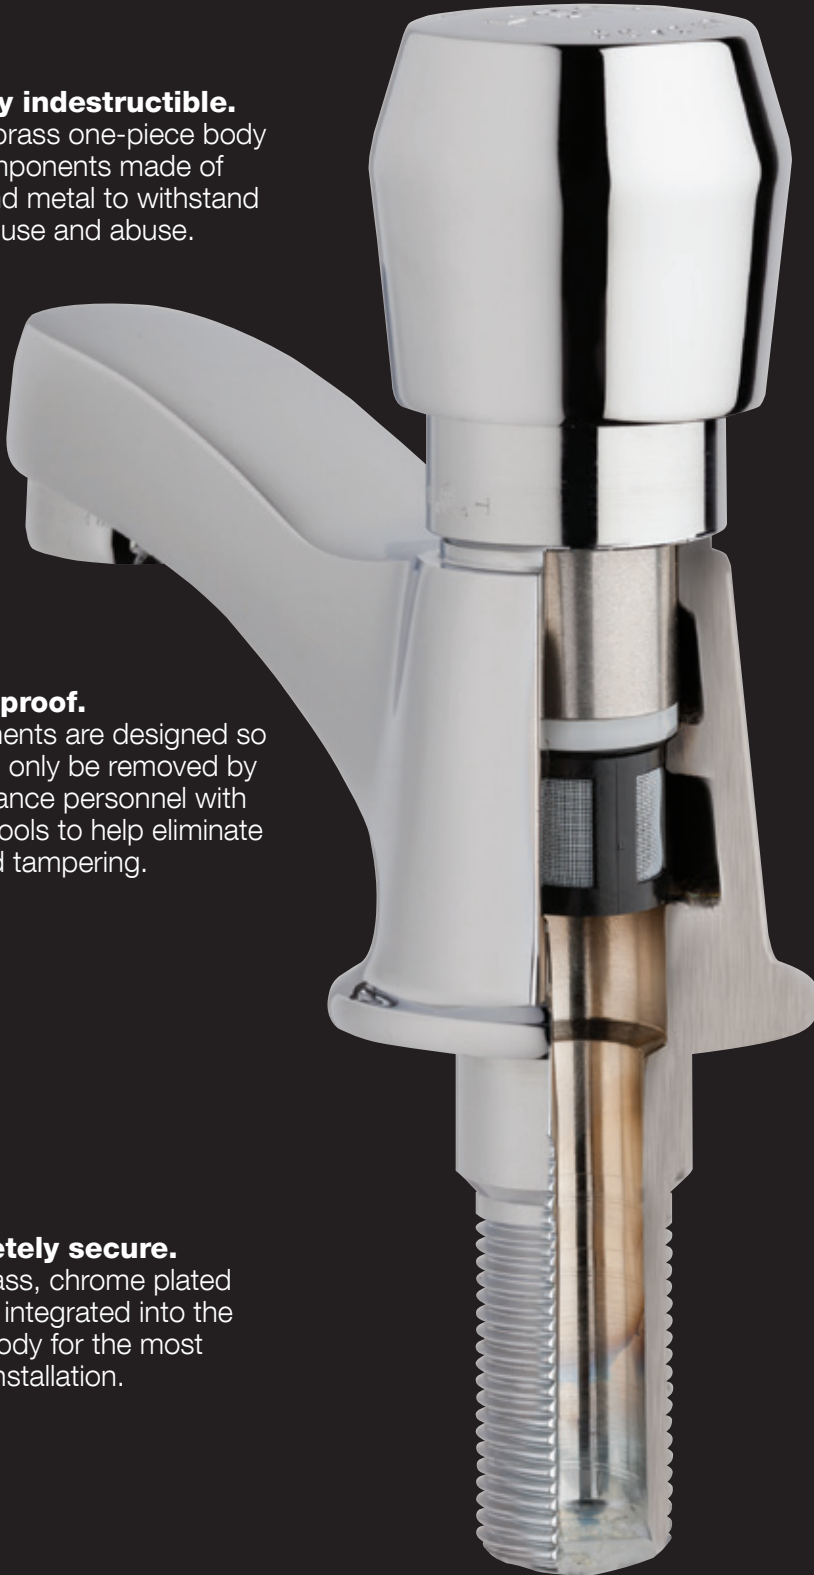

External timing nut is easily accessible by maintenance personnel with no need for water shut-off, saving time and water.

Completely secure.

Solid brass, chrome plated shank is integrated into the faucet body for the most secure installation.

Interchangeable design.

Interchangeable handles, cartridges, and outlets allow the faucet to be easily updated at any time.

Model: 333-665PSHVPAAABCP • Weight: 1.75 pounds • Cartridge: MVP adjustable metering
Body Warranty: Lifetime • Cartridge Warranty: 5-Year • Finish Warranty: 1-Year

Specifications and features vary by product

Time Saving Products

In competitive bids, it can be difficult to adequately estimate time for the plumbing projects. New fixtures and new technologies can create installation problems that impact the profitability of the job. The last thing you have time for is wrestling with inferior plumbing fittings that cause delays and prevent other trades from completing their work on time and without additional complications.

Supporting Your Time Saving on the Project

Effectively estimating labor time for competitive bid projects can be challenging. Chicago Faucets continuously refines our product offering to reduce installation time during construction. Our products are true commercial-grade and extensively tested. Once they're installed, you can be sure that they'll work reliably and keep on working, preventing lost time and lost profits caused by costly call-backs.

Faucets with Integrated ASSE 1070 Compliant Thermostatic Protection

Only Chicago Faucets offers a complete line of products with integrated scald protection. Our all-in-one thermostatic solutions for commercial installations feature integrated TempShield™ scald protection that eliminates the need for a separate thermostatic valve.

- ASSE 1070 thermostatic mixing is built into the faucet
- Quicker installation and lower installation cost
- No need for an additional, external mixing valve
- Simplified code compliance

HyTronic® Faucets – time-saving above-deck design and easy programming.

HyTronic has been designed to be the most dependable electronic faucet on the market. In ongoing laboratory testing, our electronic faucets consistently reach over 4 million faultless activations. It has also been designed for easy installation and programming.

Easy to install

All components are located above deck for fast and easy installation. Simply secure the faucet to the deck, and you're ready for setup.

Easy to program and adjust

The Commander™ handheld programming unit delivers a new level of faucet control with exclusive touch screen technology to save time on start-up.

Water Conservation

From California to Rhode Island, states have enacted new standards that limit the amount of water that can be used in public and private commercial restrooms. The EPA's WaterSense® program encourages conservation, making it easy for everyone from plumbing professionals to end-users to find water-efficient products. Already widely used in residential settings, the WaterSense label has now been adopted by several states for use with commercial lavatory fittings. LEED v4 is the most stringent program. It establishes standards for public restrooms with a baseline of 0.5 GPM @ 60 PSI.

Supporting Your Water Conservation Efforts

Chicago Faucets has been an industry leader in the development of water conserving products. Our continued focus is the development of products that conform to and exceed industry standards resulting in products that are truly water conserving.

Faucets Designed to Support Your Efforts With LEED v4 and WaterSense

Chicago Faucets offers an extensive line of products that supports the LEED WE Category with 0.35 GPM faucets for public restrooms. We offer over 170 faucets that meet the Public Lavatory (Restroom) Faucet levels listed below.

% Reduction	Points (BD+C)	Public Lavatory Faucet	
Baseline GPM		0.5 @ 60 PSI	
20%	Prerequisite	0.4	Over 170 Chicago Faucets meet or exceed these requirements.
25%	1	0.375	
30%	2	0.35	

We also offer a wide choice of faucets that meet requirements for private lavatory, kitchen, and shower – with 200+ faucets certified by WaterSense.

0.35 GPM Manual Faucets		61 Models
0.35 GPM Metering Faucets		15 Models
0.35 GPM Electronic Faucets		141 Models

Metal handle with concealed vandal proof hex screw

External timing nut, easy adjustment, no need for water shut-off

Solid brass actuator body

Stainless steel sleeve

Large filter screen for better performance, less maintenance

MVP™ – The Best Metering Valve You Can Buy

Metering faucets prevent faucet run-on and provide safety, ease of operation, and water conservation. The Chicago Faucets MVP™ cartridge allows the installer to quickly customize the faucet run-time to site conditions.

The time-tested, patented design is backed by an industry-leading 5-year warranty. The MVP cartridge, combined with a low-flow outlet, can provide significant water savings.

Proven Performance

Over 10 years of proven market performance, backed by an industry-leading 5-year warranty.

Exceptional Operation

Self-closing push button handle provides precise water flow for preset cycle time; patented self-cleaning feature for longer life span.

Easy Adjustment

Easily accessible timing adjustment nut allows timing modification (from 1 to 30 seconds) without turning off water supply.

Easy Maintenance

Simple cartridge design with a minimal number of moving parts for easy maintenance cycle time; patented self-cleaning feature for longer life span.

Support

Chicago Faucets is the best choice for large construction projects in Healthcare, Education, Commercial Buildings, Public Assembly, Food Service, and Hospitality. Our wide selection of products and competitive pricing also make us an excellent value in small projects, remodeling, and building upgrades. And regardless of the location and size of your next project, you can count on Chicago Faucets for industry-leading support to make the job a success.

Supporting You Throughout the Project

You can count on unparalleled support from initial product specification through tech support during installation. Chicago Faucets is committed to delivering the highest level of support with on-time delivery of the very best commercial faucets you can buy.

Design your own product.

In the unlikely event that you can't find exactly what you need among our existing products, our online faucet configurator allows you to build your own Chicago Faucet by mixing and matching any of our components. Our configurator leads you through the process by showing appropriate choices based on product types and features.

Implement your plan.

Our Specifier Resource Center offers a BIM-based library, Revit files, and specification sheets, allowing you to easily incorporate our products in your building plans. This dedicated area on our website allows you to easily browse products and find just the information you need.

Get it when you need it.

Chicago Faucets is committed to a level of customer service that matches the quality of our products. All of our catalog products will ship within 3 days of receipt of your order, with many products available for 24-hour or same-day shipment. See our web site for further details and a complete list of products included in our CFNow!™ quick-ship program.

Single-Source Solution

Chicago Faucets offers single-source solutions for water flow at each of your sink locations. From the restrooms in the lobby to the service sink in the basement, you can count on Chicago Faucets to provide durable, high-performance products. We offer the broadest product selection in our industry, backed by the strongest warranties and unparalleled customer support. Our CFNow!™ shipping program allows you to receive our most popular faucets right when you need them.

Supporting You In Every Room in Every Building

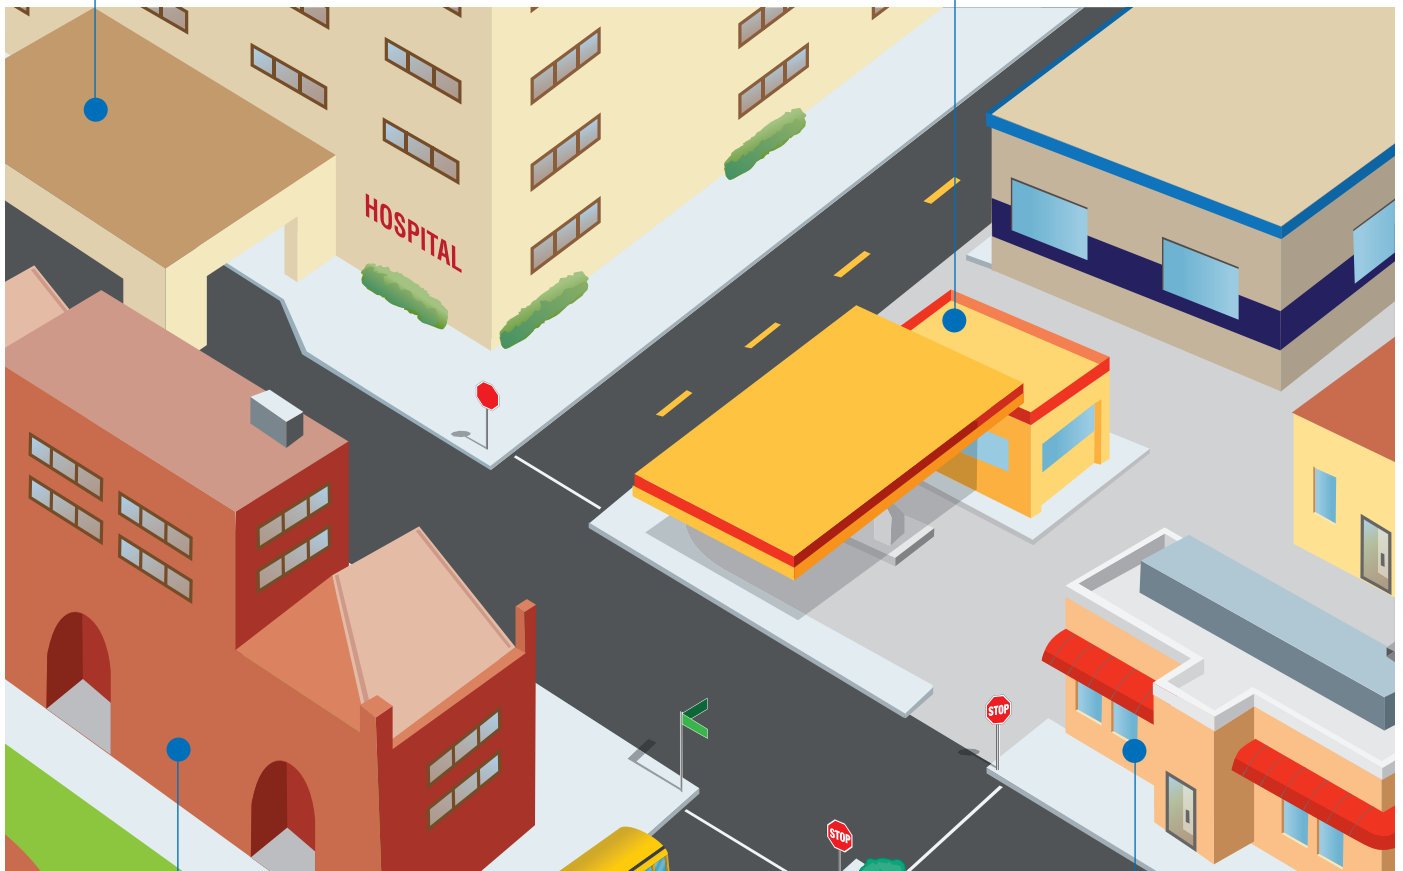

Chicago Faucets offers the industry's most comprehensive product offering to provide solutions for every application and every building. That's why Chicago Faucets is the preferred commercial brand and found in the best buildings in the country.

Healthcare

Choose from sink faucets, lavatory faucets, shower valves, bed pan cleaners, and lab faucets to cover any healthcare project.

Office and Retail

Chicago Faucets offers metering faucets, flush valves, and a wide selection of sensor-operated electronic faucets.

Education

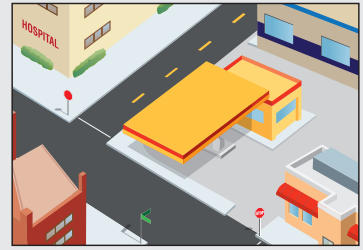

From the cafeteria to the janitor's closet, Chicago Faucets provides products for every room in the school.

Food Service

A single-source solution with a wide selection of glass fillers, pot fillers, pre-rinse sprays, and faucets for food prep areas.

Public Restrooms

Reliability, durability, and water conservation are essential for any public restroom. Chicago Faucets products for the restroom deliver unsurpassed commercial performance, help control water usage, and are easy to maintain.

The EQ Series offers convenience features not found in any other hands-free sensor faucets at such an affordable price. Simple plug-and-play installation saves time during setup and maintenance. A choice of power and mixing options, with single- and dual-supply models in polished chrome or brushed nickel finishes, means you can choose exactly the right EQ faucet for any restroom.

NEW!

The 410-T and 420-T Series feature integrated TempShield™ scald protection: now there's no need to install a separate thermostatic mixing valve below the sink. The result is a time-saving restroom faucet installation that complies with ASSE 1070 requirements and helps protect users against scalding.

TempShield®

Our metering faucets prevent faucet run-on and provide safety, ease of operation, and water conservation. Easy adjustability allows the installer to customize the faucet run-time to site conditions. Time-tested, patented design is backed by an industry leading 5-year cartridge warranty.

We are a member of the U.S. Green Building Council and support the Leadership in Energy and Environmental Design (LEED) Green Building Rating System™, to measure the efficiency and sustainability of buildings in the U.S. and Canada. If you are trying to achieve LEED Certification for your building, our low-flow outlets, metering cartridges, and sensor-operated faucets can contribute points in these areas: Water Efficiency Credit 2: Innovative Wastewater Technologies and Water Efficiency Credit 3: Water Use Reduction.

We are proud to be a partner with WaterSense®, sponsored by the EPA and designed to protect the future of our nation's water supply by promoting efficiency and enhancing the market for water efficient products, programs, and practices.

We are a charter sponsor of the Alliance for Water Efficiency, a non-profit organization that is dedicated to the efficient and sustainable use of water. It brings together a diverse range of stakeholders to advocate water efficiency and conservation.
