

Angle Stop with Integral Check

Prevent Cross-flow in Healthcare Sink Applications

The 1017-CSTABCP

A reliable and serviceable solution for healthcare hand washing sinks to help prevent cross-flow.

The new Chicago Faucets 1017-CSTABCP provides the highest quality positive stop design with an integral spring check valve to help eliminate cross-flow within the plumbing system caused by thermal expansion, dirt, and other debris.

Easy to Test

Easily identify valves in need of maintenance by simply closing stop and looking for leaks at faucet.

Added Safety

Provides an extra layer of protection with a check valve in the plumbing system before the ASSE 1070 mixing valve and its potential cross-flow problems

Reliable Performance

Solid brass body and heavy-duty brass spring check cartridge with high temperature washer for high temperature performance.

Easy to Maintain

Check cartridge is easy to access and service affordably and quickly – eliminates time-consuming and expensive process of identifying and replacing problem ASSE 1070 mixing valves.

Vandal Resistant

Loose key handle and lock shield cap with cover prevent tampering.

Codes & Standards

ASME A112.18.1 / CSA B125.1 Certified

Certified to NSF/ANSI 61, Section 9

ECAST, from Chicago Faucets, is the line of durable, high-quality brass faucets and fixtures that are designed and manufactured with one quarter of one percent (0.25%) or less total lead content by weighted average. Refer to chicago-faucets.com for the most current information.
