Chicago Faucets
The best commercial tub/shower systems.

We make the number one commercial faucet in the United States. You can bring that same commitment to quality, knowledge and support to your tub/shower applications. Our tub/shower systems are designed to match your unique needs, design, and budget. From our pressure balancing valve to our two thermostatic/pressure balancing valves you can count on consistent, durable, and dependable shower performance.

Each valve is engineered to provide a consistent, safe temperature range for your application and is designed to help reduce the risk of scalding. Like all Chicago Faucets, our line of shower valve products are manufactured specifically for commercial applications and are ideal for education, healthcare, hospitality, multi-family, and fitness applications.

Choose from three valve designs to meet your application.

Pressure Balancing
Our pressure balancing shower valve is designed to respond immediately to changes in hot or cold water pressure to provide a safe, comfortable shower. If either supply pressure fails, the valve will shut down instantaneously. A proven, dependable ceramic cartridge is housed in a rugged, brass body.

Thermostatic/Pressure Balancing
Our thermostatic/pressure balancing valve provides protection against changes in both pressure and temperature. Using advanced thermal actuator technology, it maintains a consistent temperature within 5°F and can compensate for 50% fluctuation in pressure and 25°F temperature change.

TempShield™ Thermostatic/Pressure Balancing
The TempShield thermostatic/pressure balancing valve allows the user to select a precise water temperature for showering and will maintain that temperature regardless of fluctuations in incoming pressure or temperature. Tested and factory preset not to exceed 112°F, the TempShield helps safeguard against scalding.
Our new pressure balancing shower system delivers sleek design and dependable performance at an affordable price.
Our pressure balancing valve automatically adjusts for fluctuation in incoming hot and cold water pressure to provide a consistent, comfortable temperature. With a flow rate of up to 5.5 GPM at 45 PSI, it’s the perfect choice when you want to take a basic shower to the next level. Ideal for single shower, tub/shower combination or shower/hand-shower combinations.

The SH-PB1 Shower Valve

1. **Unsurpassed Durability**
   Solid brass valve with chrome plated brass wall plate

2. **Easy Installation**
   Inlets and outlets are designed to accept both 1/2˝ NPT and 1/2˝ sweat connections

3. **Superior Performance**
   Time-tested Kerox ceramic cartridge

4. **Hot Water Protection**
   Adjustable high temperature limit stop

5. **Cross Flow Protection**
   Spring check helps prevent cross flow

6. **Easy Maintenance**
   Integrated stop valve allows water shut off at valve

7. **Easy to Identify Safety Markings**
   Wall plate features embossed “H” and “C” and color-coded temperature indicator

8. **Easy-to-use ADA-Compliant Handle**
   Solid metal handle construction, modern styling, and vandal resistant, hidden hex screw

9. **Reliable, Uniform Seal**
   Wall plate is backed with a solid rubber gasket

- ASME A112.18.1/CSA B125.1
- ASSE 1016
- ADA ANSI/ICC A117.1
Complementing the design of our pressure balancing valve, we have developed a complete assortment of matching accessories allowing you to configure a complete shower system that meets your exact needs. All of the accessories – from shower heads to slide bars – are interchangeable. Over 300 shower systems are already configured and available at chicagofaucets.com. Or you can order just the parts you need and build your own system.
Pressure Balancing Systems

Our pressure balancing valve automatically compensates for fluctuations in incoming hot and cold water pressure to provide a consistent, comfortable temperature. With a flow rate strong enough to support a shower head and hand spray, it’s the perfect choice when you want to take a basic shower to the next level.

The following is just a small selection of available configurations. Visit chicagofaucets.com to view our entire product offering.

Available Options:
- 1910-VONF Valve Only
- SH-PB1-00-000 Valve with Trim
- 1910-002KJKCP Trim Kit Only

Build A Complete Shower System To Meet Your Specific Needs

We’ve made it easy for you to build your own unique system and receive everything you need for the job – including the hand spray, diverter valve, and ADA grab bars – while placing an order with a single part number. The products featured on the previous pages are just a brief overview of possible product configurations. You’ll find over 300 shower systems on our website.

You can also quickly configure your own product number with our new shower system numbering system. The first two locations will always start with SH-PB1, our new pressure balancing valve. The other 5 number locations are used to identify the accessories you would like included in your system. Here’s an example of our model number system using the product on the right:

**SH-PB1-11-112**

Use this chart and overview of accessories to build your shower system.

Our thermostatic/pressure balancing shower valve provides extra protection from scalding and thermal shocks by constantly monitoring both the water temperature and pressure.

The rotating handle control provides a wide comfort zone that can be gradually and precisely adjusted to regulate water temperature from cold to hot.

Available Options:
- 1905-VONF Valve Only
- 1905-VOCCP Valve with Trim
- 1907-TKCP Trim Kit with Shower Head

1907-CP
- 620-A Shower Head

1907-600CP
- 600-A Shower Head

1907-621CP
- 621 Shower Head

1907-TKCP
- 620-A Shower Head

Durable Cast Brass Housing
Designed for back-to-back and easy 3- or 4-port installations

Convenience
Integral check stops

Temperature Safety
Advanced thermal actuator protects against temperature and pressure changes

Hot Water Protection
Brass-to-brass limit helps stop excessive handle rotation

Note: systems are not ADA compliant unless otherwise indicated.
Chicago Faucets’ thermostatic/pressure balancing valve provides near instantaneous response to changes in both hot and cold line pressure and temperature. If either supply fails completely, the valve will shut down immediately to help reduce the chance of scalding or thermal shock.

**Choice of Cartridge**
Select Quaturn™ or ceramic disc cartridge

**Easy Installation**
1/2” NPT female inlets and outlets

**Convenience**
Allows user to select a comfortable water temperature

**Increased Safety**
Built-in protection against scalding

We are a member of the U.S. Green Building Council and support the Leadership in Energy and Environmental Design (LEED) Green Building Rating System™, to measure the efficiency and sustainability of buildings in the U.S. and Canada. If you are trying to achieve LEED Certification for your building, our low-flow outlets, metering cartridges, and sensor-operated faucets can contribute points in these areas: Water Efficiency Credit 2: Innovative Wastewater Technologies and Water Efficiency Credit 3: Water Use Reduction.

We are proud to be a partner with WaterSense®, sponsored by the EPA and designed to protect the future of our nation’s water supply by promoting efficiency and enhancing the market for water efficient products, programs, and practices.

We are a charter sponsor of the Alliance for Water Efficiency, a non-profit organization that is dedicated to the efficient and sustainable use of water. It brings together a diverse range of stakeholders to advocate water efficiency and conservation.

Chicago Faucets, a member of the Geberit Group, is the leading brand of commercial faucets and fittings in the United States, offering a complete range of products for schools, laboratories, hospitals, office buildings, food service, airports, and sports facilities. Whatever your requirements may be, Chicago Faucets offers standard and made-to-order products that are designed to meet any commercial application.
