Antimicrobial Handles

Help prevent the spread of germs

Antimicrobial Handles

A Multi-Layered Approach for Durability and Protection.

After our solid metal wristblade handle is nickel and chrome plated, an extremely durable glass matrix coating is applied. The compounds incorporated into this coating inhibit the growth of bacteria, molds, mildews, and fungi. The coating also provides additional heat and chemical resistance for extreme durability.

Designed for Safe Operation

Curved blade design reduces hand contact by allowing easy wrist operation.

Multi-Layered Protection

Antimicrobial Coating
Chrome Plate
Nickel Plate
Metal Handle

An Easy Upgrade

Compatible with any Chicago faucet featuring a compression or ceramic cartridge.

A visible difference.

Our antimicrobial handles utilize Sureshield® Technology* and are submitted to a series of ongoing tests. In a 28-day dried film fungal test (ASTM G 21-96), the untreated sample shows significant fungal growth, while the Sureshield sample remains virtually unchanged.

Sureshield

Untreated

Immediate shipment available for retrofit or new installations.

Add a new level of protection to new or existing Chicago Faucets products. For new installations, just add them to a "less handles" faucet order.

Model	Description
317-JKSAM	One 4" wristblade handle red and blue index inserts
317-PRJKSAM	Two 4" wristblade handles red and blue index inserts

Complies with ADA requirements as specified in the Americans with Disabilities Act.

*Sureshield is formulated with antimicrobials to help suppress the growth of odor and stain-causing microorganisms on the coating. Sureshield is not intended as a substitute for good hygiene or to prevent foodborne or infectious illnesses.
